

David (大卫)

*Pre-Sales Technical Engineer | International Solution Engineer |
Software Engineer | AI Engineer | Cybersecurity*

Profile | 个人简介

USTC Software Engineering MSc candidate with hands-on international business development, pre-sales, and client engagement experience across cross-border industrial and commercial markets. Proven track record in technical-commercial proposal preparation, customer communication, solution presentation, business travel support, and digital outreach. Combines deep technical fluency in energy systems, software, and AI with strong business instincts and the ability to understand complex products quickly and communicate value clearly to international clients.

中科大软件工程硕士在读，具备国际商务拓展、售前技术支持与客户对接实战经验。擅长技术商务方案撰写、客户沟通、解决方案汇报、商务出差支持及数字营销。兼具能源系统、软件与AI技术背景和较强商务敏锐度，能够快速理解复杂工业产品并向国际客户清晰传递价值。

Education | 教育背景

2023 – Jan 2027 **MSc in Software Engineering | 软件工程硕士**, *University of Science and Technology of China (USTC)*

AI systems, software engineering, data systems, and applied digital product development.

2019 – 2023 **BSc in Computer Science | 计算机科学与技术本科**, *Changzhou University*, GPA: 4.7/5.0; ranked 1st in major and class

China Scholarship Council (CSC) Award; strong record in software engineering, leadership, and cross-cultural campus engagement.

2021 **Selected Academic Programs | 重点项目**, *Tsinghua University / Qingdao University*

Global Summer School: Innovation for SDG; Innovation & Entrepreneurship in the Digital Economy; Chinese Language Studies.

Experience | 实践经历

2025 – Present **Energy Solution Engineer | 能源解决方案工程师**, *Wanbang Digital Energy (StarCharge)*, International Solutions Center

- Work as a pre-sales technical engineer for international opportunities in EV charging, PV-BESS, and microgrid solutions, connecting customer needs with internal engineering and product teams.
- Prepare technical-commercial proposals, bilingual presentations, solution briefs, feasibility inputs, and follow-up materials for customer meetings and opportunity development.
- Support repeated business travel activities including customer visits, site inspections, requirement clarification, product introduction, and post-meeting coordination.
- Contributed to 10+ delivered or pipeline projects covering 8MW+ PV, 12MWh+ BESS, and 960kW DC charging scenarios.

2020 – 2023 **Freelance Full-Stack Developer, Networking, Tutor | 自由职业全栈开发、网络与辅导**, *Independent Practice*, Remote / Client-facing delivery

- Led end-to-end delivery of 15+ web projects while owning requirement discovery, client communication, scope alignment, delivery coordination, and handoff.
- Built and launched public-facing platforms including community and commerce-focused products, translating business ideas into working digital services.
- Strengthened customer-facing communication, proposal-style writing, expectation management, and remote delivery across multicultural stakeholders.

2019 – 2024 **Social Media Advertising | 社交媒体广告**, *Independent Practice*

- Promoted content and campaigns across major digital platforms, building practical experience in audience targeting, messaging, and online engagement.
- Added hands-on digital marketing perspective to technical and commercial work, useful for product communication and market-facing support.

- 2020 – 2023
- Teaching Assistant | 教学助理, *Changzhou University International Student Office*

Supported translation, student services, event coordination, and daily communication among international students, foreign teachers, and Chinese staff.

Built practical experience in cross-cultural communication, service coordination, and stakeholder support in a multilingual environment.

Selected Projects | 代表项目

- 2025 – 2026
- Renewable Energy Project Portfolio | 新能源项目组合

Supported or designed solution scenarios including an 818kWp PV + 261kWh BESS healthcare microgrid, a 960kW commercial fast-charging station for 100+ daily charging sessions, and a 10MWh hospital backup-energy configuration.

Contributed to system sizing, layout review, load analysis, technical presentations, and proposal refinement for customer-facing opportunities.
- 2024 – 2026
- AI Product Prototyping | AI 产品原型开发

Built a conversational RAG assistant with LangChain, ChromaDB, Streamlit, LangSmith tracing, and RAGAS evaluation support.

Developed a natural-language-to-SQL analyst assistant that generates queries, charts, and concise insights with query-safety controls for business users.

Built agentic and AI-security tools including a Todo & Email Automation Agent and a Prompt Injection Scanner.
- 2023 – 2025
- Software, Security & Platform Work | 软件、安全与平台项目

Built or launched digital products including community, education, and e-commerce platforms such as *ethiopianweb.net*, *EthioMarket*, and *helloworldEdu*.

Completed security-focused projects including a vulnerable web app, traffic analysis tooling, and hands-on web security testing.

Developed an EEG-based driver drowsiness classification pipeline with SVM reaching 98% accuracy versus LSTM at 93% and KNN at 87%.

Core Strengths | 核心能力

- Pre-Sales & BD
- Technical-commercial proposals, solution presentation, requirement discovery, follow-up coordination, customer engagement, business travel support
- Energy
- EV charging, PV-BESS systems, microgrids, load analysis, grid/off-grid concepts, techno-economic and feasibility support
- Software
- Python, JavaScript, C language, SQL, HTML, CSS, React, Node.js, Streamlit
- AI & Data
- LLM applications, RAG pipelines, LangChain, data analysis, visualization
- Languages
- English (Fluent), Chinese (HSK 4), French (B1), Amharic (Native), Afaan Oromo (Native)

Honors & Additional Information | 荣誉与补充信息

- Awards
- CSC Award; 3rd Prize, World Vocational College Skills Competition (Maze Robot); Outstanding Student Leader
- Recognition
- Featured in CGTN, CCTV1, and China Daily; 25+ academic honors and certifications highlighted in portfolio materials.
- Certificates
- Python, SQL, data analysis, Angular, Android, programming, and generative AI coursework certificates.
- Preferred Cities
- Shanghai, Suzhou, Changzhou, Qingdao, Shenzhen; open to relocation to other cities as well.
- 意向城市
- 上海、苏州、常州、青岛、深圳；也可接受其他城市调动。
- Mobility
- Open to relocation and frequent domestic or international business travel.
